# JAGADEESH PINNIBOINA

Hyderabad, India | +91 9121197720 | jagadeeshpinniboina1@gmail.com

**Python Developer | Software Engineer– Fresher**

## OBJECTIVE

Enthusiastic ECE graduate seeking an entry-level Software/IT role with skills in Python, MySQL, Django, HTML, CSS, and problem-solving. Interested in applying programming and software development skills to real-world applications while continuing to build practical industry experience.

## EDUCATION

**Sasi Institute of Technology & Engineering**, Andhra Pradesh, India — Aug 2021 – May 2025

*Bachelor of Technology – Electronics and Communication Engineering* — **CGPA: 8.0/10**

**Sri Chaitanya Junior College**, Andhra Pradesh, India — Jun 2019 – Mar 2021

*Intermediate – MPC* — **910/1000**

**A.P.R School**, Andhra Pradesh, India — May 2019

*Secondary School Certificate* — **CGPA: 8.8/10**

## TECHNICAL SKILLS

**Programming:** Python
**Database:** MySQL
**Framework:** Django, RESTAPI
**Libraries/Tools:** NumPy, Basics of Pandas
**Web Technologies:** HTML, CSS, Bootstrap
**Core Skills:** CRUD Operations, Django ORM, Forms, Authentication

## PROJECTS

**Employee Management System** *Django, Python, MySQL, HTML, CSS*

- Developed a Django-based web application for managing employee records.
- Implemented CRUD operations, login authentication, and employee information management.
- Used Django ORM and forms for database operations and user input handling.

**Article Management System** *Django, Python, MySQL, HTML, CSS, Bootstrap*

- Developed a Django-based application for creating, viewing, updating, and deleting articles.
- Implemented user authentication, CRUD operations, and form validation.
- Integrated MySQL database operations using Django ORM.
- Designed responsive web pages using HTML, CSS, Bootstrap, and Django templates.

**Deepfake Image & Video Detection System** *Python, OpenCV, Deep Learning* • Developed a system for detecting manipulated images and videos using Python, OpenCV, and deep learning models.

- Worked on identifying manipulated media using deep learning-based approaches.

## ACHIEVEMENTS

**Smart India Hackathon 2024 – Grand Finalist**

• Competed among national teams in the Smart India Hackathon with a deepfake media detection solution.
